DETAILED ACTION

This office action is a response to Applicant's amendment submitted May 4, 2009, wherein claims 1 and 11 are amended and claims 9-10 are canceled. Claims 1-8 and 11 are pending and are examined on the merits herein.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The **title** of application has been amended as follows:

change the title to "Tetrahydroquinoline derivatives and their use as FSH receptor modulators."

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the claimed compounds and method are neither taught nor fairly suggested by the prior art, as discussed above.

In view of Applicant's amendment submitted May 4, 2009, the rejection of claims 1-8 and 11 under 35 USC 112, first paragraph, for lacking enablement is withdrawn. Claim 11 has been amended to "contraception in a female," and Applicant's arguments are persuasive. As set forth in the previous office action, compounds of the Timmers declaration filed October 3, 2008 are enabled for contraception in a female, and it is considered that the examples shown in the Timmers declaration show sufficient variation within the genus of Formula I to support the claimed method.

Upon further consideration, the provisional rejection of claims 1-8 and 11 on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, 9, 13, and 16 of copending Application No. 10/540,336 is withdrawn. The genus claimed in copending Application No. 10/540,336 requires a substituent R5, which is not encompassed within the instantly claimed Formula I. Copending Application No. 10/540,336 also differs at position R3; R3 of copending Application No. 10/540,336 can be simple alkoxy but the instant claims require alkoxy substituted with other functional groups or groups other than alkoxy. The art of record does not teach or fairly suggest modification of the instant compounds at R5 or R3.

It is noted that copending Application No. 10/482,707 also claims compounds which share a similar core. However, the claims of copending Application No. 10/482,707 do not overlap with the instant claims because, as set forth above, the instant claims require R3 which is alkoxy substituted with other functional groups or groups other than alkoxy, which are not encompassed with the genus claimed in copending Application No. 10/482,707 for the same reasons as discussed above. In view of Applicant's amendment submitted May 4, 2009 and the information discussed above, the indicated subject matter is allowable over the prior art.

Accordingly, Applicant's amendment as discussed above is sufficient to remove all rejections made in the prior office action and to place the application in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LAYLA BLAND whose telephone number is (571)272-9572. The examiner can normally be reached on Monday - Friday, 7:00 - 3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anna Jiang can be reached on (571) 272-0627. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
